The Sigma Flex™ System

SIGMA FLEX™

Designed for the Lab of Tomorrow...

Laboratory technology changes today at an ever increasing rate. Today's challenge is to create an ideal workplace that has the potential to deliver future adaptability. Mott's Sigma Flex[™] systems furniture successfully meets this challenge by delivering high levels of architectural style and reconfiguration potential, not only for today's lab, but also tomorrow's.

new england lab

lab-tested furniture systems

Mott's Sigma Flex[™] system incorporates a standard core assembly from which upper and lower storage components and work surfaces are cantilevered. Further adaptability allows this system to be configured as an island assembly or a wall core assembly.

An extensive range of reconfiguration possibilities are available, allowing the laboratory designer to maximize laboratory productivity and space utilization through this stylish and ergonomically sound investment.

Mott's industry-leading flexible design and manufacturing capabilities allow the already very adaptable Sigma Flex[™] system to be further modified to meet each laboratory's unique requirements through the incorporation of custom features.

What's more, Mott's Sigma Flex[™] system is a proven practical solution. It can be installed and reconfigured with minimal down time, through the use of basic skills and without special tools.

For additional information and help in planning contact Mott Manufacturing.

igma Flex™

SIGMA FLEX™

ADAPTABLE LABORATORY FURNITURE SOLUTIONS

Modular Support Structure Design

Each core system is fabricated from prime quality furniture grade cold rolled steel.

Support systems are a core and panel style support structure.

Core structures can be supported by anchoring to suitable flooring material or may be supported by structural table legs (outrigger legs).

Modular components are suitable for single faced wall core or double faced peninsula or island configurations.

Core assemblies have removable panels on all sides.

Modular Support Structure Features

Core or wall systems support work surfaces, under counter cabinets and overhead storage components.

Structural core systems may be configured for floor anchor alone, or additional support legs may be used if floor is not of sufficient strength for cantilever support.

The core system allows plumbing, electrical and other services to be installed using commonly available mounting systems.

Suspended cabinets can be supported using hook shaped rails attached near the front and rear of the cantilevered work surface. Cabinets can be added at any time and it is possible to remove and relocate a fully loaded cabinet to any position between legs.

All access panels can be fastened with a positive friction catch which snaps into place. The panel does not require adhesives to be attached. Panels are half width and it is possible to remove panels without removing suspended cabinets.

Upper storage cabinets are adjustable vertically and laterally and are removable.

Suspended cabinets can be relocated without disturbing the countertop.

The vertical height of table work surfaces, upper storage units and shelves can be adjusted in 1" increments without the use of special tools.

Material Gauges

Sigma Flex™

• Riser uprights	16 gauge galvanized
 Upright connecting members 	16 gauge
 Base cover 	18 gauge
 Riser caps 	PVC, ABS or CRS
 Closure panels 	18 gauge
 Floor anchor brackets 	3″ x 2″ x 1/4″ thick

• Sigma Flex[™] Wall Cabinet Hanger Rails are required to hang above-counter storage cabinets on to Sigma Flex™ systems.

• Order rails to match width of support structure frame (Telescoping Rails are not suitable for cabinets smaller than 24" wide). If ordering rails larger than the wall cabinet, two rails are required for support.

- Telescoping Rail is adjustable up to 5".
- Wall cabinets must be ordered with option code "FR" to suspend from Sigma Flex[™] and Sigma Cart[™] products. See wall cabinet section to order cabinets.

Option Code

- R1
- Use this option code when ordering Sigma Flex™ 12" deep Island Core assemblies.
- For new installations only.
- For use to run utilities and services on Sigma Flex™ 12″ deep island cores and counter top uprights.
- · Additional uprights allow for center shelves.
- Center shelves must be ordered 12" less in width to accommodate service drop.
- Detachable inserts are easy to remove, allowing access to services on both sides of service drop.
- Wall cabinets cannot be added with option R1 due to load capabilities.
- Full Height Island Raised Core with R1 option is a standard height of 67".
- Full Height Island Core with R1 option is a standard height of 78".
- Custom heights are available, please specify when ordering.

Right Hand Option Code	Left Hand Option Code
