

STRATFORD SERIES

stainless steel rugged, sterile

Manufactured to the same specifications as our painted steel casework, our stainless steel cabinets can be built with your choice of type 304 or type 316 stainless steel. It is ideally suited for environments that require a high degree of cleanliness, durability, or are subjected to high moisture and extreme temperatures. Easy to clean and corrosion resistant, stainless steel is perfect for critical environments such as operating rooms, animal facilities and controlled temperature rooms.

stainless steel
