Brown University, a renowned research institution, has unveiled its new lab to the Innovation and Design District in Providence, Rhode Island. This high-tech facility is designed to cater to the growing demand for life sciences research and is equipped with pre-plumbed and pre-wired Optima benches and red oak base cabinets allowing for ultimate flexibility and reconfiguration. These durable lab benches adapt to changes in scientific processes and provide an environment always ready for creative thinking and experimentation. Pro Series Fume Hoods are incorporated throughout the laboratory spaces to provide enhanced safety when hazardous chemicals are used. The lab's design reflects Brown University's commitment to fostering partnerships and collaboration in scientific research and highlights its dedication to the advancement of knowledge and innovation.
