

# the right formula for ARIAD Pharmaceuticals- Binney Street

## OVERVIEW

- **Project:** 40,000 sq. ft. Biology and Chemistry Labs
- **Architect:** Payette
- **GC:** John Moriarty & Associates

## In this new lab for ARIAD Pharmaceuticals - Binney Street

Designer Steel Casework

---

Stainless Steel Casework

---

RFV2 Series Fume Hoods

---

Pro Series Fume Hoods

---

Optima Series Square-Leg Benches

---

Phenolic Resin Work Tops

---

The new building at 125 Binney Street in Kendall Square was fit out to meet ARIAD's goal for a modernized facility housing efficient, sustainable and collaborative laboratories. New England Lab provided pre-plumbed and pre-wired freestanding bench systems that were shortened to a custom height. Painted steel cabinets with European Steamed Beech wood fronts warm up the space. Due to the open ceiling concept, custom overhead ceiling panels were drop-mounted with strut and fully covered to neatly conceal the pipes and wires. The vivarium contains a single stainless steel fume hood and stainless steel casework with a custom decorative reveal detail. Fifty-seven additional hoods provided throughout the new facility include high performance bench-mounted and standard floor-mounted configurations.
