

Blueprint Medicines - 45 Sidney Street

OVERVIEW

- **Project:** 100,000 sq. ft. Headquarter Renovation
- **Architect:** Tria
- **GC:** The Richmond Group

In this new lab for Blueprint Medicines - 45 Sidney Street

Painted Steel Casework

Observation2 Series Fume Hoods

Safeguard Series Fume Hoods

Optima Series Square-Leg Benches

Opti-core Shelf System

Epoxy Resin Work Tops

To facilitate the advancement of multiple drug candidates and discovery stage programs, Blueprint renovated their headquarters to a state-of-the-art laboratory and office space. New England Lab provided painted steel casework with epoxy resin work surfaces to service the lab space storage and research needs. Working with the manufacturer, a core-based shelf system with Optima features was designed and created to mimic the freestanding bench systems while creating the ability to specialize workstations to users. For improved sight lines, Observation2 hood was installed to maximize the visibility within the biology lab. Additional products such as modern fume hoods and stainless steel pegboards were also supplied to complete the space.
