In this new lab for GMCR - Keurig

Manchester Series Painted Steel Casework

Sigma Flex Free Standing Bench System

Cambridge Series Steel Table Systems

Pro Series Fume Hoods

Keurig, subsidiary of Vermont-based Green Mountain Coffee Roasters renovated their Burlington, Massachusetts facility, making it more than three times the original space, at 494,000 sq. ft. This new facility allows room for growth in research and development. New England Lab supplied their painted steel lab casework, free standing bench systems, steel table systems, snorkels and wire shelving. Custom Flex Core frames with cupsinks were provided for the Testing Lab.
