

the right formula for Mölnlycke Health Care - Lab Renovations

OVERVIEW

- **Project:** 1,787 sq. ft. Laboratory Renovations
- **Architect:** Harriman Architects + Engineers
- **GC:** PC Construction

In this new lab for Mölnlycke Health Care - Lab Renovations

Manchester Series Painted Steel Casework

Pro Series Fume Hoods

Epoxy Resin Work Surfaces

Biological Safety Cabinet

Laminar Airflow Workstation

Mölnlycke Health Care, a Sweden based surgical and wound care products manufacturer increased their production capabilities in the United States by purchasing a facility in Wiscasset, Maine. New England Lab was asked to help deliver solutions for their workbench storage and lab equipment needs. Multiple rooms in the laboratory were renovated in both single tone and two tone steel casework paint schemes. Additionally, bench mounted fume hoods, a biological safety cabinet and a laminar airflow workstation were provided for this project. Miscellaneous products such as plumbing fixtures, pegboards, and acid and flammable cabinets finish out the space.
