Montgomery College - Germantown Campus

OVERVIEW

- **Project:** Renovated university organic chemistry laboratory
- **Architect:** SST Lab Planners
- **GC:** CDCI, Inc.

In this renovated space for Montgomery College - Germantown Campus

Lexington Series Wood Veneer Casework

Epoxy Resin Tops and Sinks

Custom wall cabinets with integral whiteboards

Pro Series Fume Hoods

This renovation project converted a computer lab into a new state-of-the-art organic chemistry lab. The design places the Pro Series fume hoods around the perimeter of a “U” shaped student/faculty work area. Lexington series wood base cabinets with locks were utilized to provide ample storage underneath the fume hoods. The student faculty area was built with Lexington Series wood custom benches and tables, epoxy work surfaces and custom wall cabinets with integral whiteboards.
