In this new lab for Suffolk University - 20 Somerset Street

[Lexington Series Wood Veneer Casework](#)

[Observation Series Fume Hoods](#)

[Pro Series Fume Hoods](#)

[Adjustable Height Tables](#)

[SterilGARD Biosafety Cabinets](#)

Suffolk University built a new academic facility on Somerset Street with the intent to start building towards the future. New England Lab supplied furniture and casework for four floors of science laboratories in the ten story structure. Plain sliced Red Oak veneer casework with black epoxy work surfaces were provided for the project, along with biosafety cabinets and equipment, teaching and chemical fume hoods, and local exhaust arms. The plastic laminate tables adjust in height with convenience and ease when writing desks need to convert to lab benches. The mobile cabinets allow storage of audio visual equipment and facilitate sharing of technology between classrooms.
