WaterSaver Fixtures

---

Tufts University was looking to furnish a few new laboratories with a very aggressive time frame. New England Lab's rapid ship division, NEL Direct, supplied mobile tables, wall shelving, plumbing fixtures and fume hoods. Some tables were equipped with overhead shelving, wall cabinets, and powerstrips as required. All tables can accommodate levelers and/or casters and are height adjustable for maximum flexibility. The majority of the products were delivered and installed within three weeks to keep the project on track.
