

the right formula for UMASS Worcester Medical School - Biotech 5

OVERVIEW

- **Project:** Education and research facility
- **GC:** TRG Builders

In this new lab for UMASS Worcester Medical School - Biotech 5

Lexington Series Wood Veneer Casework

Freedom Series Fixed Overhead System

Epoxy Resin Tops

Pro Series Fume Hoods

For this project UMASS partnered with New England Lab to match existing casework from another building while incorporating flexibility and a variety of products. Laboratory furniture for the project included Lexington Series wood base cabinets, add-a-drawer mobile cabinets, height adjustable tables, write-up work stations and custom glass wall cabinets. The laboratory benches consist of our Freedom Series fixed overhead system with adjustable shelves, electrical raceways and plumbing fixtures. Our Lexington Series casework includes casters for all under counter casework to create a flexible work environment. Each bench consists of custom Lexington Series tables, some including height adjust-ability for specific equipment or researcher needs. The lab space also includes fume hoods, wood pipe chases, adjustable wood shelves, and epoxy and plastic laminate work surfaces.
