- **GC:** Turner Construction Company

In this new space for Vertex Pharmaceuticals - Fan Pier

Manchester Series Painted Steel Casework

Stratford Series Stainless Steel Casework

Steel Table Systems

Custom Bench Fume Hoods

Floor Mounted Fume Hoods

Overhead Service Carriers

As Vertex Pharmaceuticals continued to grow they needed to relocate their Massachusetts workforce to one central campus. They chose Fan Pier in Boston's Innovation District, one of the largest mixed-use waterfront, LEED-certified communities in the country. For Vertex's new global headquarters is two 18-story buildings totaling 1,554,000 square feet. In Building A, New England Lab provided their painted steel lab casework, stainless steel lab casework, and steel table systems. NEL also equipped the labs with overhead service carriers, custom bench fume hoods and large floor-mounted hoods. In Building B, NEL's custom fume bench fume hoods and floor-mounted hoods were supplied.
