In this new lab for Werfen

Cambridge Bench System

Painted Steel Casework

Pro Series Fume Hoods

Phenolic Worktops

Metro Shelving Racks

Lab Chairs and Stools

A 118,000-square-foot warehouse facility at 180 Hartwell Road in Bedford, MA, has been transformed into a flexible laboratory space. These labs are furnished with versatile Cambridge Benches, featuring 1" black phenolic work surfaces, two-tiered upper steel shelving, and suspended cabinets designed for flexible storage needs. Bench-mounted Pro Series fume hoods with acid and flammable specialty storage cabinets below ensure top-tier performance and cost-efficiency. The facility is equipped with freestanding and corrosion-resistant polymer shelving for cold storage in environmental rooms. Ergonomically designed lab chairs and stools are engineered with durability and adjustability to accommodate the comfort of every user. This innovative lab space is highly adaptable for current researchers and can be easily reconfigured for future research advancements.
