## In this new lab for Casco Bay High School - Science Lab

Lexington Series Wood Veneer Casework

---

Pro Series Fume Hoods

---

WaterSaver Plumbing Fixtures

---

Epoxy Work Surfaces

---

Casco Bay High School, located in Portland Maine, sought to renovate this 1,128 sq. ft. classroom. Transformed into a new chemistry lab, this classroom can accommodate up to 24 students. Plain sliced maple veneer fixed casework, Pro Series fume hoods, a mobile cabinet, and plumbing fixtures were provided by New England Lab. Height-adjustable maple tables with black epoxy work surfaces were utilized in the center of the space. These tables can be organized into lecture style seating or easily combined for multiple sized student groups at the teacher's discretion.
