

the right formula for CoNCERT Pharmaceuticals - C Building

OVERVIEW

- **Project:** 40,000 sq. ft. design-build project
- **Architect:** Olson Lewis Dioli & Doktor
- **GC:** The Richmond Group

In this new lab for CoNCERT Pharmaceuticals - C Building

[Manchester Series Painted Steel Casework](#)

[Cambridge Series Mobile Tables](#)

[Custom Epoxy Resin Worksurfaces](#)

[Pro Series Fume Hoods](#)

When the Richmond Group needed a reliable and experienced partner to fit-up the new CoNCERT Pharmaceuticals facility, they called on the team at New England Lab. New England Lab provided a variety of services and products that helped meet the requirements of the aggressive 40,000 square-foot project. The products utilized were painted steel Manchester Series casework, epoxy resin work surfaces and Pro Series fume hoods. In order to provide mobility, we provided our steel Cambridge Series welded-frame tables that blended with the balance of fixed casework.
