- **Location:** Charlotte, North Carolina

In this new lab for Coatings Manufacturer - R&D Suite & QC Lab

Painted Steel Casework

Phenolic Resin Work Tops

NovaGuard Fume Hoods

Cambridge Series Tables

Broen-Lab Service Fixtures

In North Carolina, an established coatings manufacturer was looking to renovate their research and development suite/quality control laboratory and reached out to NEL for assistance. Working directly with the client, we supplied painted steel overlay cabinets with chemical resistant phenolic work surfaces. The casework island ends feature a radiused corner filler for a streamlined appearance and include cabinets with tinted glass doors, providing a semi-transparent visual of the items inside. High-performance research hoods are equipped with side windows to enhance aesthetics and light transfer throughout the space.
