- **Design Assistance:** New England Lab

In this new lab for Green Willow Dental - Renovations

Painted Steel Casework

Wood Veneer Casework

Epoxy Resin Work Tops

Plastic Laminate Cabinets

Solid Surface Work Tops

Plumbing Fixtures

Green Willow Dental needed assistance to renovate their Dental Operator and Hygiene rooms. Cost savings were discovered through conceptual design and product selection enabling them to upgrade their dental lab and reception desk as well. For patient rooms, quartered maple cabinets and a solid surface extendable work top aid the dental assistants. Wall cabinet doors in each room dispense two glove sizes. A cutout in the top for waste disposal, electronic hands free faucet and soap and towel dispensers all promote a germ-free environment. For the laboratory white painted steel cabinets were paired with gray epoxy tops to organize storage items. A vented access panel allows access to dental equipment and hides it from view. Wall shelving for additional storage complete the space.
