

the right formula for Ipsen - 650 East Kendall

OVERVIEW

- **Project:** New Laboratory Fit-up
- **Architect:** Payette Associates, Inc.
- **CM:** Consigli Construction Co., Inc.

In this new lab for Ipsen - 650 East Kendall

Manchester Series Painted Steel Casework

Stratford Series Stainless Steel Casework

Optima Series Free Standing Bench Systems

Cambridge Series Steel Table Systems

Pro Series Fume Hoods

Ipsen is a European biopharmaceutical company that recently relocated their U.S. Headquarters to Cambridge, Massachusetts. New England Lab supplied and installed bench-mounted Pro Series fume hoods, painted steel casework, and stainless steel casework. The project featured adaptable Optima Series free standing bench systems that were pre-plumbed and pre-wired with electrical and data for quick connection to ceiling service panels. These pre-loaded lab services saved time and money over traditional service installation, and the innovative adaptability of the benches support Ipsen's growth as they pave the way for new science.
