## In this new lab for Pharmaceutical Company - Lab of the Year 2003

Lexington Series Wood Veneer Casework

---

Stratford Series Stainless Steel Casework

---

Epoxy Resin Tops and Sinks

---

Pro Series Fume Hoods

---

This seven-story research building included four floors of laboratories, two of which were dedicated chemistry labs. The project features Lexington Series maple casework and over 80 Pro Series fume hoods. The adjustable reagent shelving was constructed using double sided uprights and maple shelving. Other products within the project were safety stations, Stratford Series stainless steel casework and overhead service carriers.
