Maryland's state-of-the-art Forensic Medical Center, one of the most modern medical examiner's facility in the country, was designed for today's needs with the flexibility for future technologies. New England Lab was selected to provide durable lab furniture for research, diagnosis and teaching. Our Manchester Series painted steel casework in fixed and mobile options were customized to meet specific laboratory needs. The Autopsy suites were fitted out with our Stratford Series stainless steel casework and countertops in order to provide the necessary durability. To complete this custom lab we provided epoxy countertops and constant volume Pro Series fume hoods in painted and stainless steel with combination sashes.
