new england lab
lab-tested furniture systems

In this new lab for NCSU's College of Veterinary Medicine- Main Building - Third Floor Module C

Wood Veneer Casework

Optima Series Freestanding Bench System

Overhead Service Panels

Safeguard Fume Hoods

North Carolina State University's College of Veterinary Medicine was looking to update one of their 7,500 sq. ft. laboratory modules to a state-of-the-art laboratory. What was once a group of individualized labs is now a large open space with labs and offices that foster collaboration. The maple wood veneer casework was stained with a "cider" color for a warm and rich tone. New England Lab also provided overhead service panels, fume hoods, and a pre-wired and pre-plumbed movable freestanding bench system with custom electrical configurations per the client's request.
