

Quinsigamond Community College - Dental Lab Renovation

OVERVIEW

- **Project:** 2nd Floor Dental Teaching Laboratory Renovation
- **Architect:** PRA Architects
- **GC:** Builders Systems Inc.

In this new lab for Quinsigamond Community College - Dental Lab Renovation

Wood Veneer Casework

Epoxy Resin Work Tops

Preparing their students with the skills and knowledge to attain a career in Dental Hygiene Practice, Quinsigamond Community College decided to renovate the Dental Material Lab with new furniture and equipment. New England Lab provided plain-sliced Maple veneer fixed base cabinets with epoxy work surfaces, wall cabinets and student cubbies. Collaborating with the contractor and architect, NEL provided a custom pedestal-style millwork bench that surrounds the dental chairs and instructor podium. Unique “suction stations” were created by utilizing a full height frame that supported overhead lights for the dental students.
