

Shape Therapeutics - 1 Design Center 7th Floor

OVERVIEW

- **Project:** 33,000 sq. ft. Tenant Fitout
- **Architect:** ACTWO Architects
- **Contractor:** Sterling Construction
- **Location:** Boston, Massachusetts

In this new space for Shape Therapeutics

Cambridge Bench System

Epoxy Resin Work Tops

Painted Steel Casework

Pro Series Fume Hoods

Shape Therapeutics Inc. has a new space at the Innovation and Design Building in Boston, Massachusetts. This biotech company required a lab that was both adaptable and durable as they continue their work developing RNA medicines that can prevent genetic disorders. New England Lab furnished an adjustable-height modular bench system to meet their needs. Suspended and mobile painted steel cabinets are both incorporated to optimize flexibility. Blue shelving and storage cabinets add a pop of color to each lab bench. Gray epoxy tops provide a durable and chemical-resistant work surface while keeping the space bright. Pro Series Fume Hoods were also included to provide the users with safe breathing zone protection whenever it is needed.
