## In this new lab for Trillium Brewing Company - Quality Control Lab

Painted Steel Casework

---

Epoxy Resin Work Tops

---

Cambridge "Q" Series Table System

---

Phenolic Resin Pegboard

---

Epoxy Resin Sink

---

Trillium Brewing Company, a farmhouse-style craft brewery, needed a quick fix for their small quality control laboratory at their second location in Canton, Massachusetts. New England Lab partnered with the Rapid Ship Division, NEL Direct, to supply and install casework and furniture within 4 weeks. With this small room setback from the merchandise and tasting bar, the installation was able to take place without disruption during retail operation hours. NEL Direct's Bright White painted steel casework and adjustable height tables were provided for the project based on the client's requirements. Black epoxy resin work surfaces, a phenolic pegboard, plumbing fixtures and sinks completed the space.
