- **Contractor:** Turner Construction

In this new lab for Whittle School & Studios - G30 Project Ltd

Painted Steel Casework

Stainless Steel Work Tops

Cambridge Series Adjustable Height Tables

Demonstration Fume Hood

Focused on becoming an elite global private learning institute, Whittle School & Studios has settled into an office complex in the United States capital of Washington, DC. New England Lab was selected to provide bright white painted steel cabinets with type 304 stainless steel work surfaces. Movable and height-adjustable tables about custom hexagonal sink assemblies to allow for various science classroom and group work layouts. The double-sided fume hood allows the instructor to set up experiments within the prep lab that will be observed from the STEM laboratory. Glass door tall and wall cabinets and a recessed safety station complete the space.
