OVERVIEW

- **Project:** Education facility
- **Architect:** Ann Beha Architects
- **GC:** Consigli Construction

In this renovated space for Worcester Academy - Kingsley Hall

Lexington Series Wood Veneer Casework

Epoxy Resin Tops

Pro Series Fume Hoods

The Kingsley Hall renovation project provided much needed updates to seven laboratories used for biology, chemistry and physics. New England Lab helped convert their traditional lab space into multipurpose laboratory classrooms with custom Lexington Series hexagonal fixed casework students stations in order to foster collaboration. These student stations incorporated custom pull out writing tablets and concealed outlet and wire management boxes. Custom Lexington Series vented chemical storage cabinets and mobile prep stations provide the necessary storage and flex work space needed.
